
Wash trough V240 made of stainless steel

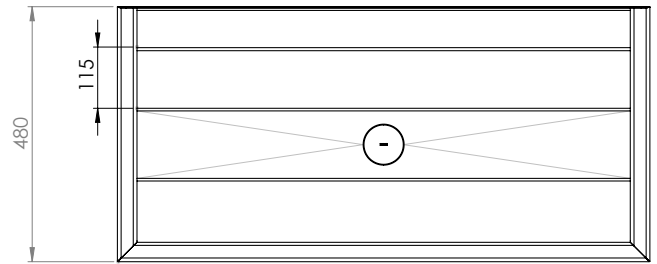

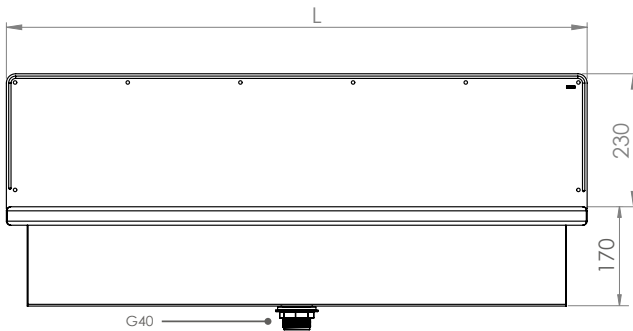

A stainless steel wash trough has to be hard-wearing and high quality. Purus stainless steel wash basins are practical for environments with high demands on durability and hygiene, such as public toilets, sports halls, restaurants and institutions. The wash troughs are supplied with a PUM odour plug. The wash troughs can be supplemented with accessories such as a sediment trap and plaster separator.

Purus gives you a total solution with a neat design for optimal hygiene.

- **Central outlet**
- **PUM as standard – no unpleasant odours!**
- **230 mm high splash guard**
- **Soap rack for installing mixer**
- **Stainless steel brackets included, designed for simple installation**
- **Stainless steel grade EN 1.4301**
